**On a separate sheet of paper, draw the property lines, both sides, front and back. Include all existing structures and the proposed construction, and how many feet the proposed structure is from each property line. If more detail is needed, additional sheets may be added to the application.**

The easements are five (5) feet strips inside all lot lines except those lines coincident with street right of ways, in which case the easements are ten (10) feet wide. No permanent project will be permitted to be built within the easements.

It is preferred and suggested that the property owner be present and available upon inspection of the property for approval or final inspection. Failure to do so could result in a disapproval of the project. The Environmental Committee reviews permits on the 3rd Saturday of each month after the monthly Board meeting.

No other construction will begin until each approved permit is completed. All work must be done in 90 working days. If 90 days have elapsed before beginning construction, you will need to re-submit a new construction permit. If you have not completed the work in 90 days, an extension of the construction permit will need to be submitted. Each phase of construction will have its own construction permit.

Periodic inspections will be made by a member of the Environmental Committee. All construction will be inspected upon completion. **This permit must be posted on the property until the final inspection is performed.**

*Disclaimer:* It is the property owner's responsibility and not the CBPOA Environmental Committee to accurately mark their property lines according to the survey information on file with Murray County. The Environmental Committee bases their decisions, in part, on where the property lines have been marked. Should they approve a building permit and it is later determined that the structure(s) are outside the setback requirements and/or on neighboring properties, the CBPOA holds no liability for this error. All responsibility for any errors regarding the marked property lines lies with the property owner. Review the Environmental Committee Rules and Regulations before submitting this form. Not all rules are listed on this form.

**I HAVE READ AND AGREE TO COMPLY WITH THE CURRENT RULES, REGULATIONS, AND COVENANTS.**
